ALUMINIUM COMPOSITE

DIBOND DIGITAL B1

Dibond Digital is the first aluminium composite material with a lacquer system that's optimised for direct to substrate digital printing. The surface of Dibond Digital provides enhanced ink adhesion for UV-curing inks. The combination of both the enhanced ink adhesion and the extreme flatness of the panel makes it not

only possible to be printed with very fine structures and lines, but also allows increased printing speed. The thickness tolerance of only 0.2mm allows a very small clearance between panel and print heads. (The complete Dibond range available.)

WINDOW STICK INKJET PRINTABLE ROLLS

Coala Window Film SV

A unique (optically) clear polyester repositionable/removable window film that can be applied with an innovative wet cling process.

Drytac Viziprint Illuminate

Drytac Viziprint Illuminate is a semi-matt reverse-printable, translucent PET film. Repositionable, it is ideal for window graphics, decals or stickers, privacy and decorative glass applications and backlit displays.

Drytac Viziprint Impress

Drytac Viziprint Impress is an ultra-clear polyester film with a unique silicon adhesion technology allowing easy application and residue-free removal multiple times.

YUPOTako

YUPOTako means Octopus in Japanese. The new YUPOTako sticks to flat surfaces just like an Octopus, due to its micro suction structure. It uses no adhesive, leaving no sticky feeling on the label.

Drytac SpotOn B1

Drytac SpotOn is a 100mic Monomeric PVC film available in matt white and clear finishes with a dot pattern pressure sensitive polyacrylate.

Penstick Self Cling Digital

Penstick Self Cling Digital is a unique high gloss static PVC that will adhere and reposition to smooth clean glossy surfaces without the need for adhesive.

YUPOJelly

YUPOJelly is a crystal clear film that sticks to flat surfaces with no adhesive due to its clear micro structure on the back side. The surface has been specially developed for UV Silkscreen, UV digital and UV offset printing. YUPOJelly is free of PVC and 100% recyclable.

EASY APPLY SPECIALITY FILMS

Coala Window Film SV

A unique (optically) clear polyester repositionable/removable window film that can be applied with an innovative wet cling process.

Penstick Self Cling

Self Cling is a unique high gloss static PVC that will adhere and reposition to smooth clean glossy surfaces without the need for adhesive.

Drytac Viziprint Illuminate

Drytac Viziprint Illuminate is a semi-matt reverse-printable, translucent PET film. Repositionable, it is ideal for window graphics, decals or stickers, privacy and decorative glass applications and backlit displays.

YUPOTako Solvent

Tako means Octopus in Japanese. The new YUPOTako sticks to flat surfaces just like an Octopus, due to its micro suction structure. It uses no adhesive, leaving no sticky feeling.

Drytac Viziprint Impress

Drytac Viziprint Impress is an ultra-clear polyester film with a unique silicon adhesion technology allowing easy application and residue-free removal multiple times.

Drytac SpotOn

Drytac SpotOn is a 100mic Monomeric PVC film available in matt white and clear finishes with a dot pattern pressure sensitive polyacrylate.

YUPOJelly

YUPOJelly is a crystal clear film that sticks to flat surfaces with no adhesive due to its clear micro structure on the back side. The surface has been specially developed for UV Silkscreen, UV digital and UV offset printing. YUPOJelly is free of PVC, 100% recyclable and therefore environmentally friendly.

POLYESTER FILM

Oracal 351

Oracal 351 Polyester Film is a dimensionally stable 23 micron film. It is suitable for application on cutting plotter systems but can also be printed. The high gloss metallic cover shows best effects when applied to transparent surfaces.

Oracal 352

Oracal 352 Print Polyester Film is a dimensionally stable 23 or 50 micron film with good ageing behaviour. Its surface is specially treated to improve printability in screen and offset printing and the permanent water resistant solvent acrylic adhesive fulfils most demanding requirements.

PRESSURE SENSITIVE LAMINATES

PVC + MONOMERIC LAMINATES

Drytac Protac

The Drytac Protac range of pressure-sensitive laminating films protect images from the damaging effects of moisture, fingerprints, dust and other contaminants including UV rays. All Protac laminates incorporate UV stabilisers and/or absorbers for added image protection and resistance to fading. Most of the Protac laminates are coated with an aggressive, cross-linking solvent acrylic adhesive for adhesion to the most demanding output media. See speciality and polyester section for Protac Heavy coat weight adhesive laminates. For UV print Protac Glossy also includes HCW (Heavy Coated Weight) adhesive.

Oraguard 200

Oraguard 200 is a 70mic soft PVC over-laminate with a polyacrylate adhesive and a high level of UV protection. 2 year durability.

Oraguard 210G

Oraguard 210G is a 70mic soft PVC over-laminate with a solvent adhesive and a high level of UV protection. 4 year durability.

Drytac Interlam Pro

Drytac Interlam Pro is a range of pressure-sensitive over-laminating films coated with an aqueous (waterbased) adhesive which are certified outdoor durable for 3+ years. The Interlam brand contains UV stabilisers to prevent discolouration and the degradation of film and adhesive.

SPECIAL MOUNT FILMS

Drytac UltraTac

Drytac UltraTac is a 12mic clear polyester high tack, high bond strength mounting film coated on both sides with a pressure sensitive aqueous acrylic adhesive.

Drytac TwinTac

Drytac TwinTac is a 50mic clear PVC mounting film coated on both sides with a pressure sensitive aqueous acrylic adhesive. Its double release papers protect the adhesive layer before it is required thus preventing any contamination during handling.

Drytac RemoTac

Drytac RemoTac is a 13mic clear polyester mounting film with permanent adhesive on the exposed side and a removable adhesive on the other.

Drytac WindowTac

Drytac WindowTac is a visually clear 23mic polyester film, coated one side with a removable aqueous adhesive and the other side with a permanent aqueous acrylic adhesive. The micro grooves that are imparted into the removable adhesive allow for easy air evacuation and applications using a hand squeegee.
